Weight: 200lbs

It was made in: 2008

How long did it take to make? 2 months

Type & quantity of material: 7oz. Vinyl

Number of handlers required: 12

Other Interesting Facts:

Hi Ho, Kermit the Frog here... It isn't easy being green, but Kermit the Frog has stolen the hearts of millions since Jim Henson created him in 1955—out of his mother's old spring coat and two halves of a ping pong ball. Since then, Kermit has starred in countless television shows, movies and commercials, and is now the biggest and greenest star in today's parade. At 30 feet tall, maybe this Kermit balloon will finally be able to get away from Miss Piggy!
